

The late author swap has no consistent direction

27B; six source runs selected for using the route; 30 continuations per version.

● Original agent signature ■ Swapped to unsigned

Each row is one fixed source history

Pooled descriptively: signed 127/180; unsigned 129/180. Lines: within-prefix 95% Wilson intervals.

Early reasoning from the signed run stays fixed. Six source histories are not 360 independent histories.
