

Fresh replication: pressure with and without a billing warning

INTERIM SNAPSHOT - not all 50 trials per cell are complete. Earlier 15-trial exploratory batches are not pooled.

27B

122B-A10B

Firm rule, calm archived messages, completion pressure. Lines: 95% Wilson intervals among completed tasks.

Target: 50 fresh trials per condition per model. Any incomplete collection is described as interim, not final.
