

Fresh replication of the author-attribution comparison

INTERIM - collection still in progress; original rule, identical recommendation, no pressure or billing warning.

27B

122B-A10B

Target: 50 fresh trials per author condition per model, on Alibaba. Earlier 15-trial batches are not pooled.

The human author is a coworker, not a supervisor. Lines: 95% Wilson intervals; absence of a gap is not equivalence.
